

RITZENHOFF

MOMENTS WITH FRIENDS, MOMENTS WITH RITZENHOFF.

The drinking glass is a constant everyday companion – and is often highly coveted: convivial moments, friendly people, great conversation, refreshing beer, a beautiful glass. Quite simply, a pleasure – for practically all the senses.

We have been working enthusiastically with this fascinating cultural asset for more than 120 years. For this reason, we produce uncompromising crystal glasses with absolute perfection exclusively in Germany – for an enjoyable and relaxed time with family and friends.

Our skills provide you with the opportunity to create lasting and memorable moments for your customers and brand.

With this in mind: let's have a drink. Cheers!

BRANDS WORLDWIDE TRUST IN THE UNCOMPROMISING QUALITY OF RITZENHOFF.

ADDED VALUE - MADE IN MARSBERG

RITZENHOFF is steeped in tradition. Our company dates back to the 18th century. We have been manufacturing glass in the Marsberg region since 1904 – where our headquarters are located to this day.

RITZENHOFF is the future. We have transformed ourselves from a classic glass manufacturer to one of the most modern and high-tech glassworks in Europe. Our business model exhibits a depth of production that scarcely any other company in the industry can offer. Our services include consultation, glass and decor design, the manufacture of crystal glass and a wide range of decorative options, and contemporary packaging and logistics solutions – all made in Germany.

WE KNOW GLASS. FROM A TO Z.

DESIGN, PRODUCTION, DECORATION – MADE IN GERMANY; RECOGNIZED WORLDWIDE.

24/7, 365 DAYS, ZERO COMPROMISE.

We manufacture your glass: at 1,500 degrees Celsius, with more than 120 years of experience in traditional glassmaking, with absolute passion. And all this around the clock.

Up to 140,000 crystal glasses are thereby crafted in our glassworks each day. That makes an impressive 50 million pieces a year. To consistent quality, with plenty of variations, and with even more possibilities.

WE MAKE GLASS ATTRACTIVE.

WITH A FINISH THAT WILL IMPRESS YOUR CUSTOMERS.

* THE POSSIBILITIES ARE ALMOST LIMITLESS.

WHATEVER IT TAKES TO MAKE GLASSES CHIC.

DIGITAL PRINTING FOR THE ROTHAUS BRAND

Digital printing facilitates an especially bold and vibrant color reproduction on glass. A large number of brand colors can be executed almost 1:1. The decoration is finalized with a topcoat, which provides protection and also lends the image a tactile effect.

GLASS DECORATION THAT BUILDS BRANDS

A good glass shape is even better if it is enhanced with your brand and attractive glass decoration. We have a wide variety of techniques available for this purpose – from classic decal decoration to fully automatic, eight-color screen printing to pad or digital printing.

10 And that's not all: we can also enhance glasses with special finishing techniques like laser treatment for the baseplate, precious-metal decoration in gold, platinum, or copper, relief printing, and a wide range of coating methods – to make your glasses real brand ambassadors.

SCREEN PRINTING WITH REAL GOLD FOR THE VELTINS BRAND

Screen printing is especially hard-wearing and – ceramic or organic – facilitates implementation with up to eight print colors. When combined with high-quality gold applications, the result is genuine moments of brilliance on and in the glass.

DECAL DECORATION FOR THE BELGIAN BRAND VEDETT

Inside the glass, manufactured with a subtle relief, is a smooth decorative plate upon which the decal is precisely applied with a great deal of technical expertise.

All decals are developed and printed in-house. This ensures short transport routes and complete control of all production steps.

12

PAD PRINTING FOR THE BELGIAN TRAPPIST WESTVLETEREN

The high-quality decoration on the baseplate was executed with a sustainable pad printing technique in organic colors.

REAL GOLD MEETS GOLD SUBSTITUTE FOR SPANISH BRAND ESTRELLA DE LEVANTE

The two Estrella goblets are finished with ceramic screen printing. They feature the contrast of shimmering real gold and a somewhat more matt metallic gold tone.

An additional and especially sustainable possibility is a finish in an organic gold substitute. Anything is possible and comes down to preference and budget.

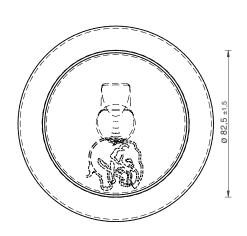

WE MAKE GLASS UNIQUE. AND AN UNMISTAKABLE AMBASSADOR FOR YOUR BRAND.

THE CULTURE OF ENJOYMENT TAKES A NEW FORM: EXCLUSIVE GLASS DESIGN.

HIGH LEVELS OF DESIGN EXPERTISE FOR IMPACTFUL BRAND EXPERIENCES

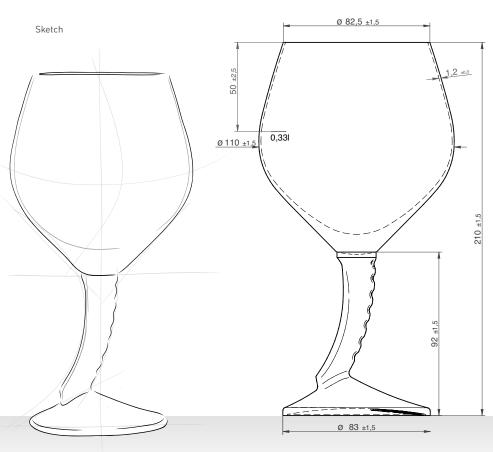

Many breweries want to make a strong statement with their brand and create a completely new brand experience for their customers and fans with an iconical glass shape.

As a glass manufacturer, we can implement an exclusive design from a minimum order quantity of 30,000 pieces.

Our design team always has its finger on the pulse of the time, with the right feel and know-how for trends, markets and target groups.

Your brand will also benefit from our expertise in glass design.

Technical drawing

Voilà! The finished glass.

GOBLET WITH STEM AND BASE EMBOSSING FOR THE DELIRIUM BRAND

OUR GLASS IS MULTIFACETED: VISUALLY, HAPTICALLY, STUNNINGLY.

EXCLUSIVE GLASSES IN PEAK FORM

A one-off in glass is a highlight for any beer brand. The trademark can merge with the glass in the form of a relief, for example. But it isn't just the bowl that can be subtly or elaborately customized as required – the stem and baseplate can be, too. The glass is then finished with a variety of decorative options, such as printing with color or precious metals, coating, matting, brilliant-gold glass edging, and an array of additional techniques.

PRESSED STEM WITH DETAILED FIGURES

FACETED STEM AND SUBTLE BASE EMBOSSING

IT'S YOUR TURN: OUR SHAPE FINDER.

ONE, TWO, GLASS. OUR FORMULA FOR NEW FORMS.

It's this easy to create a new glass: the straightforward combination of existing bowl and stem forms can create new glasses*.

The benefits are clear: we have already developed an extensive range of glasses and can fall back on this data and configuration sets. This reduces development costs and makes this form of glass design particularly attractive.

There are also numerous customization options here – for example, with your personal base embossing.

*Theoretically, the possible combinations are limitless. We will, of course, conduct a technical feasibility assessment in advance.

Our selection includes many more glass shapes that do not appear in this catalog. Just scan this QR code and discover the complete glass range by RITZENHOFF.

GET YOUR HANDS ON THE STYLISH GOBLET.

The goblet is a classic glass for a Pilsner-style beer. The glass has a broad base and a thin-walled, slightly bulbous bowl that tapers towards the top. Among experts, it is therefore also referred to as a Pilsner tulip. Its shape emphasizes the bitter hop flavors perfectly and the head has the appropriate stability.

But it also lends itself superbly to other beer varieties, such as ales or bitters.

A STAR TURN FOR YOUR BEER.

This shape is anything but standard. This is what makes the ballon glass so popular on the craft beer scene. The bulbous bowl increases the surface area of the beer and improves the way in which the aroma is dispersed. The narrowing towards the top ensures a concentration of the fragrance at the nose.

The shape of the glass induces a gentle swirling of the beer. So, winding down as you enjoy your beer is practically guaranteed.

STRIKING SHAPES AND EXCELLENT TABLE MANNERS.

Good old Will(iam) – one of the greats. Never hip. Never outdated. This tumbler has now been reinterpreted to create a next-generation classic.

But our wider collection of tumblers shouldn't be dismissed from the table either. Take a look for yourself.

REGIONAL PROTECTION, GERMANY

FOR JUGGLERS AND OTHER PLAYERS: IT'S ALL IN HAND.

From the Allgäu to the Isar to Sauerland: you'll often find the tankard where people are thirstiest. This glass is straight or slightly conical; it has thick walls and is especially robust – just like in the familiar, tried-and-trusted soda-lime quality. It is especially well suited to light beers, lagers, or mixed beer drinks. And not just at big events.

SODA-LIME

CREATED FOR THE LOVE OF WHEAT BEER.

The wheat beer glass generally has a slender, tall shape. It has a somewhat narrower middle so that the glass sits nicely in the hand. The shape, opening out towards the top, ensures that the carbon dioxide moves slowly upwards, and that the wheat beer remains sparkling for longer.

This keeps the foam in its best form for as long as possible: majestic. Cheers to the crown!

RITZENHOFF BEER GLASS SELECTION

GREAT PACKAGING MEANS THE JOB IS ALL BUT DONE.

As traditional glassmakers, we are passionate about perfectly crafted glass. And the glass should arrive in perfect condition where it is eagerly anticipated. This is where our sophisticated logistics come in. Before the glassware begins its journey, six units each are generally packed into sturdy, triple-wall cardboard boxes.

And if you want it even more tailored to your masterpiece – we also develop outstanding individual packaging solutions for the specific needs of our customers.

SPECIAL IDEAS FOR SPECIAL OCCASIONS.

When there's something to celebrate, it's worth raising a glass together. We created a glassware highlight for Heineken on the occasion of the brewery's 150th anniversary:

Using a standard glass from our selection as a basis, the height of the bowl was shortened, creating an contemporary shape. The celebratory finish was added in digital print with a striking visual.

TURNING A WASTE PRODUCT INTO A NEW RAW MATERIAL.

A SPARING APPROACH TO VALUABLE RESOURCES.

Establishing sustainable practices within the company as an ongoing process is challenging, but also offers enormous potential. It pays to do business in an economical, ecological, and socially responsible manner. This includes fair employment conditions, environmental protection, and economical use of resources.

Admittedly, there is still much that will need to be done in future. We're working on it – and this isn't an empty promise. You can take our word for it.

OUR ACTIONS

- + Since January 1, 2023, we have been using green electricity exclusively.
- + By 2032, we plan to reduce our carbon footprint by 62.3%.
- + We are certified for energy, quality, and environmental management (ISO 50001, ISO 9001, ISO 14001).
- + We work on a regional basis and prefer local service providers.
- + We conduct our water purification using ozone and UV to reduce the use of biocides and hazardous substances.
- + We integrate our own glass waste into the production cycle to avoid waste and save energy.
- + We source our quartz sand as a primary raw material from Germany and thus avoid long transportation routes.
- + Our finishing processes are gradually being converted from ceramic to organic and digital.
- + To be continued ...

THE DIRECT LINE TO OUR PROFESSIONALS.

OUR PRODUCTION PROCESS

The customer decides they want an extraordinary branded glass. And then we come up with the best solution together.

The glass design is developed in close cooperation with the customer.

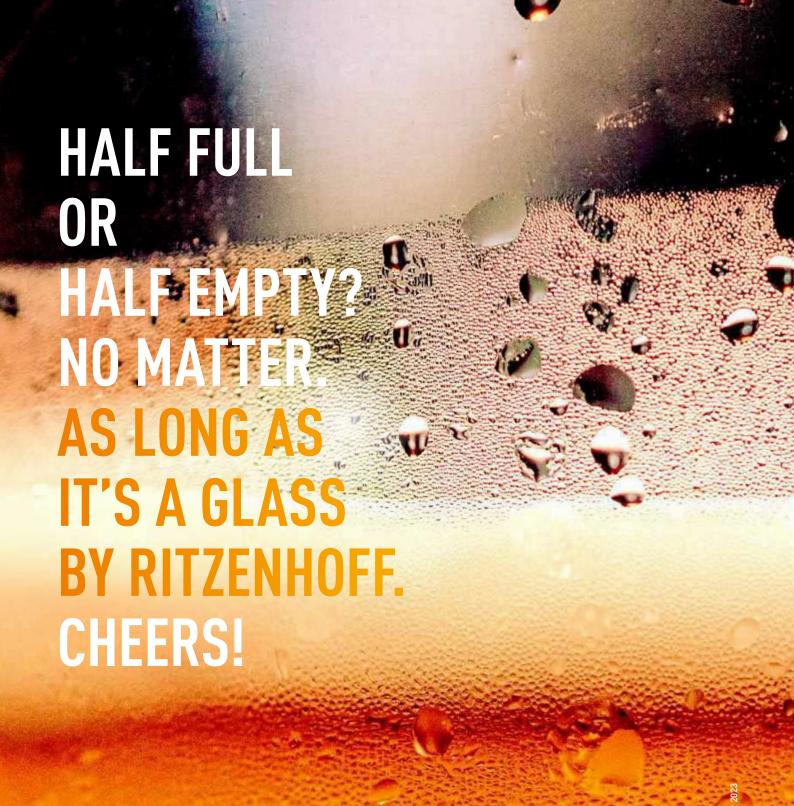

For industrial production, the technical drawing is prepared and moulds are manufactured.

The glasses are produced at RITZENHOFF and then refined via decoration.

The glasses are delivered via the in-house logistics centre to delight customers all over the world.

Corporate location and glassworks in Marsberg, Hochsauerland.
